Product description

Advantages of the electric-powered transport trolleys JLA-eForm 15/30 H

- The load can be rotated around any desired pivot point, offering maximum flexibility in positioning.
- The trolleys can be positioned flexibly beneath the load and adapted to the center of gravity as well as the available space.
- An integrated sensor detects load shifts, enhancing transport safety.
- Control via a large touchscreen allows for comfortable and intuitive operation of up to three trolleys simultaneously.
- All-wheel drive ensures high traction and enables safe movement even on uneven surfaces.
- Long operating time 4 to 5 hours at full load under optimal conditions.
- LiFePo battery technology

Product properties

Operational time (h) 4 - 5 Castor dimensions (Ø x I mm) 200 x 78

Speed (m/min) 9

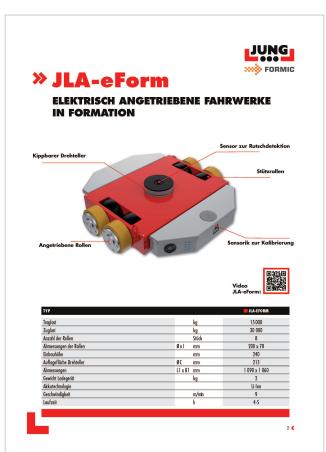

Dimensions (mm) 1 090x 1 060

Supporting surface of turnable Ø (mm) 215
Number of castors (Pieces) 4
Height (mm) 240
Weight charger (kg) 2
Pulling capacity (t) 30
Load capacity (t) 15
