

# Transport trolley JFB 60 H Professional - NEW

Power and stability - the JLB 40 H transport trolley from JUNG can lift loads of up to 40 t with an installation height of 230 mm.

**Product number** 10 601 206-H

**Weight** 372kg

## Product description

Features of the JUNG Transport trolleys JLB 60 H Professional

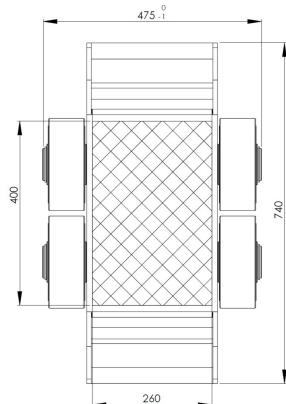

- Despite their high load-bearing capacity, the transport trolleys feature a compact and lightweight design.
- The newly developed transport trolley with a reduced number of rollers allows for a space-saving construction while maintaining the same load capacity – made possible by state-of-the-art roller technology.
- The more compact design and reduced number of rollers result in a significant weight reduction.
- By halving the roller width and doubling the number of rollers, steering is noticeably improved and frictional forces during cornering are significantly reduced.
- The mechanical pendulum suspension of the cassettes or axles ensures uniform load distribution across the rollers and the floor surface – eliminating the need for a complex and failure-prone hydraulic leveling system.
- All transport trolleys are delivered pre-assembled and are ready for immediate use.

JUNG transport trolleys are fitted with ball-bearing rollers for smooth and effortless movement. The rollers come standard with a low-wear tread.

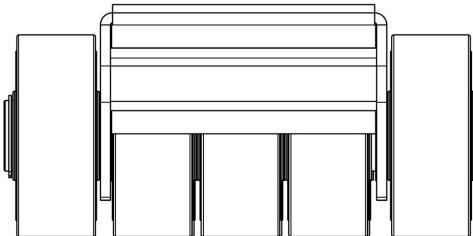

## Product properties

<b>Cassettes adjustable from - to (mm)</b>	700 - 1 500
<b>Load capacity (suitable)</b>	61 - 200 t
<b>Weight JUWAthan® (kg)</b>	372
<b>Number of castors (Pieces)</b>	2 x 10
<b>Cassette dimensions (mm)</b>	740 x 475
<b>Height (mm)</b>	230
<b>Supporting surface per cassette (mm)</b>	400 x 260
<b>Load capacity (t)</b>	2 x 30
<b>Connecting bar with joint (mm)</b>	2 x 1 540
<b>Castor dimensions (Ø x l mm)</b>	200 x 85
