Product description

Advantages of the hydraulic jack JH 10 G plus EX

- version without a integrated pump unit

- Slide shoe design inside the guiding track prevents twisting of the piston inside the lifting cylinder. This guarantees better force distribution, less friction and reduced wear compared to conventional jacks.
- Reduced maintenance costs due to removable stroke unit and easy to change slide shoes.
- Extremely lightweight with high performance due to the use of highquality material and innovative design.
- Continuous adjustment to the load due to swiveling safety toe. Secure stableness in every situation even in lifted position.
