Transport trolley JLA-e 15/30 facelift

The electric-powered transport trolley JLA-e 15/30 G is easy to operate and does not require an additional towing vehicle. Suitable for loads up to 30 tons.

Product number 22 015 200-G
Weight 245kg

Product description

Advantages of The electric-powered transport trolleysJLA-e 15/30 G facelift

- There is no separate towing vehicle required.
- This device is highly practical as it comes equipped with a rechargeable battery and a handy wireless remote control. The remote operates on 2.4 GHz, features a cable connection socket, and can flexibly switch between two-hand and one-hand operation, making it suitable for both left- and right-handed users. The one-hand operation allows the cart to drive perfectly straight with ease.
- Thanks to its direct drive motor, the device boasts an impressive runtime (4-5 hours at full load under optimal conditions).
- The new generation of drives prevents rolling away, even when powered off.
- Short charging time for the self-propelled transport cart JLA-e 15/30 G with the optimized charger: 3-4 hours.
- The new battery display shows various parameters in real time, such as voltage, current, or charge level.
- It can rotate 360°.
- The transport cart features infinitely variable speed control.
- The further developed LiFePo4 cell technology with higher energy density has enabled a more compact design.
- The batteries are interchangeable with one another.
- The device is compatible with the G-series and H-series tank rollers. These transport carts are not included in the delivery.
